SSO
ServiceNow

SSO

Okta SSO

Use the following form to automate the provisioning of both Okta and ServiceNow identity components to facilitate the setup for Single Sign-on through Okta.

Existing Okta Customers

- Check the "Existing Customer" checkbox
- Fill in your Okta instance and API token. Please see the Okta Documentation link to discover how to generate an API key

New Okta Customers without an Okta Instance

- Uncheck the "Existing Customer" checkbox
- Enter the desired Okta Prefix. This will be the subdomain name for your Okta instance (eg. xxxxx.okta.com)
- Enter the desired Company Name as it will be displayed in your Okta account
- Enter the desired first and last names for the Okta Administrator user that will be auto-generated
- Specify the Email address for the Administrator user

Okta Application Settings

Application Name: _____
This application name will be used by users logging in via SSO from their browser.

Display Name: _____
The display name is what you want users to see when they log in. It can be different than the application name.

Sign-in Page: _____
If you have a custom sign-in page, enter the URL here. If not, leave blank.

Redirect URI: _____
The redirect URI is the URL where users are sent after successful authentication. It must be a valid URL.

Logout URI: _____
The logout URI is the URL where users are sent after successful logout. It must be a valid URL.

Client ID: _____
The client ID is a unique identifier for your application. It is generated by Okta.

Client Secret: _____
The client secret is a password used to authenticate your application. It is generated by Okta.

Grant Type: _____
Select the grant type for your application. Options include: Authorization Code, Implicit, Password, Refresh Token, etc.

Scopes: _____
Enter the scopes required for your application. Scopes define the permissions your application needs.

Notes: _____
Add any additional notes or instructions for the administrator.

Submit The Okta Provider SSO Plugin is not installed on this browser. The plugin must be installed before the Okta SSO component can be configured.

Dismiss The Okta Provider SSO Plugin is not installed on this browser. The plugin must be installed before Single Sign-on will function.
